# HALF OF ILLINOIS' 1 WITH NO FROST

Twenty-five Percent of Corn Will Not Mature at All

By Associated Press Leased Wire Springfield, Ill., Sept. 18 .- Forty percent of Illinois corn crop will be safe by September 20, and 50 percent by October 1, providing there are no killing frosts in that period, A. J. Surratt, federal agricultural statistician for Illinois estimated today in his semi-monthly crop report for the state. Frosts to date have done little damage, he said.

"Due to unusually cool weather corn has made little progress this month," the report said. "The outlook for much of the crop appears un certain. In a general way, the better corn is reported in the central, west central, southwestern and lower southern areas, with more of the late and less promising corn reported in the lower central, eastern and northern areas. Returns from over the state indicate that 40 percent of the crop will be safe from frost by September 20, and 50 percent by October 1. #### THE LONG WHITE SEAM-

As I came round the harbor buoy The lights began to gleam The crags were white as cream; And I marked my love by candelight, Sewing her long white seam. It's aye sewing ashore, my dear Watch and steer at sea,

It's reef and furl, and haul the line, Set sail and think of thee.

sweetly my love sings! Like a shaft of light her voice breaks spoon butter brought to the boiling My soul to meet it springs As the shining water leaped of old,

That brought me in to thee,

### **DOUBLE HEADERS** TODAY MAY DECIDE NAT. LEAGUE RACE

Double Defeat for Either Cleveland of Three Leaders Will Ruin All Chances.

By Associated Press Leased Wire With the Giants Robins and Pirates playing double headers the National League pennant may be won or lost

By winning twice while Brooklyn and Pittsburg lost two, the Giants would increase their lead over the former to three and one half contests and over the latter to four and one half, an apparently safe margin with an average of ten games left for ach club to play.

But, by losing two while their rival Brooklyn won a brace, New York would fall Pittsburgh half game behind Brooklyn into Chicago . econd place, only a half contest ahead of the Pirates and into a battle St. Louis royal which might go on into the Philadelphia closing minutes of the season. Either Pittsburg or Brooklyn would virtually fall out of the race by los. No games played; rain and wet ing two if the others won twice.

Walter Johnson continued to up hold his major responsibilities in the Washington drive, by holding Cleveland to seven hits yesterday and winning his 13th straight victory of the year by a score of 3-2. Sam Rice, Senator right fielder, made a season's record for the American League by hitting his 24th consecutive game.

Waite Hoyt weathered a storm to win the first Yankee victory at St. Louis. He was touched for 12 hits but his mates converted their nine off Urban Shocker into a 7-3 triumph. In the second the world's champions slugged five Brown hurlers for 15 hits and 8-7 decision.

Detroit fell six games behind the wo leaders when the Athletics drove Whitehill from the box in a ninth inning rally which earned four runs and a 9-8 victory. Cobb by making three hits needs only three more to break his joint major league record with Willie Keeler of 200 or more nits in eight seasons

The White Sox traded last place to Boston by launching a heavy assault upon Ferguson which gave them a 3-2 ame over the Red Sox.

#### The McCormick-Deering Corn Picker Gets More Corn than the Average Hand Husker

HIS efficient machine plays no favorites-it picks up and husks practically every ear and nubbin. It shells little or none of the corn, and delivers the clean-husked ears into the wagon alongside of the picker. With a McCORMICK-DEERING Corn Picker, two men can easily do the work of from five to seven hand huskers-without the drudgery common to hand picking.

Should The Brim Be Down?

When the so-called "snap-brim" lightweight felt hat was introduced, it was meant wholly for a sporting style to be worn on the golf course or for country and knockabout. Like so many other fashions, which are lifted out of their proper environment and mated to the wrong occasion, the "snap-brim" was adopted by youngsters for town and business wear to which it is manifestly unsuited. The style is too calculatedly careless to be sanctioned for any but the most informal occa-

sions. This was quickly recognized, and now the hat, admirable in its place and for its purpose, is confined to the links and suburban club where it belongs.

The WELL DRESSED

By BEAUNASH

Correct Glothes To Meet The Obligation Of Every Occasion

There are three ways of wearing the "snap-brim" hat-flipped down in front; flipped down at the side or flipped down all around. Any ordinary hat will not serve the purpose. It must be a hat of extremely soft, light-bodied felt expressly made to be freely and flexibly manipulated at the whim of the wearer. In its proper surroundings together with the correct accessories, the "snap-brim" is a smart hat having a jaunty, devil-may-care air about it which marks the gentleman-sportsman who is careful to have his clothes look careless.

It is characteristic of all Autumn hats that the crowns are fuller and, to correspond, the brims are wider with less of a roll and more of a flat set to them. This is rendered necessary by the fashionable natural-shouldered, straight-back coats and full-draped trousers with which small shapes in hats do not harmonize.

You are well advised to own four hats to meet the obligation of every occasion during Autumn. These four comprise two soft felts. gray and tan; the black derby for an occasional and agreeable change-off and to accompany one's Tuxedo suit and the featherweight "snap-brim" style for the sports. Possessing these four, a man is correctly and completely hatted under all circumstances and he has, besides, sufficient variety to match or contrast with different suits and top coats. Do not wear a tan hat with a gray suit. Do not wear a gray hat with a brown suit. Always try to make ends meet as, for instance, a tan hat, tan gloves and tan shoes. Robert Foran, newspaper correspondent, accompanies the Theodore Roosevelt expedition into Africa in 1969. They arrive at Mombassa, the "gateway of British East Africa," and then make the railroad journey to their first camp on the game-crowded Kapiti Plains, 288 miles from the coast. With Colonel Roosevelt are his son, Kermit, and three scientific members of his staff—Major Edgar A. Mearns, Edmund Heller and J. Allen Loring.

NOW GO ON WITH THE STORY The nights in camp were always delightful, for we all gathered round a log-fire after dinner and exchanged experiences of life in the open and

wild places. Cunninghame and Tarlton had many a thrilling tale to tell of elephant and lion hunts in the Congo, and East Africa; and the three naturalists shared with us their experiences in Alaska, the Philippines, the Rocky Mountains, Mexico and elsewhere: while Colonel Roosevelt told us many a good story of his adventures on western ranches.

On his ranch in the west he had a splendid type of man as foreman, whose name was "Hell-Roaring" Bill Jones. It so happened that Jones was the sheriff of the county, and Roosevelt was his deputy sheriff. Jones was quite a local "character."
